Providing Access to Videos Hosted on ShareStream

If you haven’t already, contact Jackie Burger (Jacqueline.burger@bucks.edu) to request to stream video content.

Once the request is made, streaming video content will be purchased and/or the right to stream the video content will be acquired.

The content will then be uploaded to our ShareStream video streaming server.

To access the content on ShareStream, add to your Canvas course space the ShareStream Pick-n-Play External Tool:

1. Log into Canvas.
2. Choose a course.
3. Select "modules."

4. On one module, select "add content."

5. Choose "external tool."

6. Scroll down and click "ShareStream Pick-n-Play."

7. Change Page Name

8. Click on "add item."

9. Publish newly added ShareStream video link
