Sharing a VoiceThread with your Class and Enabling Student View/Comment of the VoiceThread

This process has two parts. In the first part, you will share a VoiceThread you created with your course. In the second part, you will add VoiceThread to the module in which the VoiceThread is most relevant and publish it to enable student access to the VoiceThread.

Part 1: Sharing a VoiceThread

Go to your Canvas course space. Go to the module in which you have added VoiceThread. Click on the link to VoiceThread.

Hover your mouse over the VoiceThread you would like to share with the class. Don’t see your VoiceThreads? Click the triple horizontal line icon along the top left side of the screen. Click Owned by me. Hover over the VoiceThread you would like to share, and click the share arrow icon.
Select the appropriate course from the menu on the left. Click the view/comment/edit icon to enable or disable those functions for your students. Enabled functions are green, disabled are black. Then, click share.

Part 2: Enabling Student Access to the VoiceThread
Go back to your Canvas course space. Go to, or create, the module for which you would like your students to access the VoiceThread. Add VoiceThread to the module by clicking the plus sign next to the module title, change the drop down menu across the top to Add: External Tool. Select VoiceThread as the External Tool. Rename the VoiceThread External Tool page to the name of the lecture you are sharing. Click Add Item.
Go back to the module and click the link to your VoiceThread lecture you just posted. Select the VoiceThread Course View OR Individual VT option. Course View will show students all VoiceThreads you share with the course. Individual VT will allow you to pick just one VoiceThread you created to share with the students in your course.

Go back to the module again, and publish the link to the VoiceThread lecture.

Now you and your students will be able to interact with the lecture. The lecture should start playing as soon as the link to the VoiceThread opens. Click the plus sign that appears while the lecture is playing to add a comment. Direction on how to add comments to a VoiceThread can be found at http://bucks.libguides.com/voicethread/usevoicethread toward the bottom of the page.
