Searching Multiple Databases

Education Research

First, go to [www.bucks.edu](http://www.bucks.edu) and click the link to the Library.

Next, click the databases icon.

Click the link to the first database on the list, Academic Search Premier. If you are off campus, you will need to log-in with your Bucks username and password.

Click the Choose Databases link.

Select Academic Search Premier, Education Full-Text, ERIC and Masterfile. Click OK.

Enter your keywords and click search.
Your results will display as well as a left menu with limiters. Use the limiters to narrow the date, resource type, and/or subject term to best match your research topic. You can, and should, always try different keywords in your search to expand or narrow your results list. I recommend using the date limiter. Also, always click Show More to see all of your options in each category of limiters.
