How to Use iBooks on an iPad

The Apple iPad is a revolutionary device, and one of today's most popular tablet computers. This article will walk you through some of the many amazing features that can be found in the iBooks application for your iPad.

Steps

1. Download the iBooks app from the app store.

2. Download a book from the iBookstore. There are thousands of options to choose from, and a number of books are free!

3. Wait for the book to appear in your iBooks library. This may take a minute.
4. Click on the cover of your newly purchased book.

5. Click on any word in the book to get a popup with a series of options, including highlight of a word, paragraph or a part of a story.

6. Click on a word to find out its definition from the built in dictionary.
7 Click on the magnifying glass in the upper right hand corner to search the book for a word, and what page it is on. Choose the light to change the brightness of the backlight.

8 Rotate your iPad to read in landscape or portrait mode.

9 Click on the A's to change the size of the font of the book, as well as the text size.
10 Slide your finger across the screen to turn the page to the left or the right.

Tips
