Setting up @live.bucks.edu Student Email on an iOS device

Follow this tutorial to setup your iPhone, iPod or iPad to automatically send and retrieve email from your @live.bucks.edu email address.

1. Click the Settings icon on your home screen. Click Mail, Contacts, Calendars.

2. Click Add Account...

3. Click Microsoft Exchange.
4. Enter the Email and Username as <your username>@live.bucks.edu. Leave Domain blank. By default the Password is bd followed by your six digit birth date, in the format bdMMDDYY. Click Next to continue.

5. The Server should automatically configure to pod51008.outlook.com or bl2prd0310.outlook.com. Click Next to continue. Your account will now be set up.

6. By default iOS will only sync email from the previous 3 days. To retrieve all email, go back to the Settings app, then Mail, Contacts, Calendars. Click the name of the new account, in this case live.bucks.edu.
7. Click Mail Days to Sync.

8. Click No Limit to receive all emails that have been sent to your account. You can now access the email through the mail app on your home screen.
